Cyclone Shredder

Bridging the gap between batwing and flail mower

The MAJOR Cyclone Shredder has been designed to do the work of a flail mower but requires a fraction of the power and fuel that a similar sized flail mower would consume.

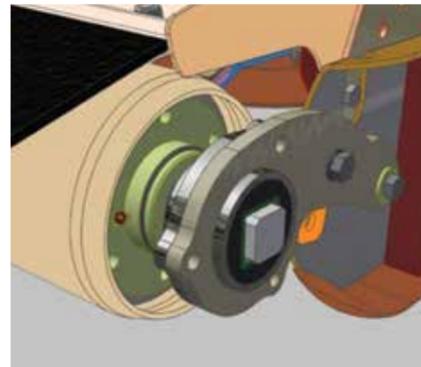

These machines are ideal for every day **grassland management** and the **shredding** of corn, cotton, maize, milo stalks, potato vines, sugar-beet tops and other crops.

The MAJOR Cyclone is also ideal for **orchard maintenance** to enable disease control and maximise yield potential. The unique blade system delivers a fine mulch and even distribution of mulched material. This speeds up the decomposition process and puts **nutrients** and moisture back into the soil.

The MAJOR Cyclone Shredder is manufactured using Strenx® 700 MC high-strength steel and hot-dip galvanized to EN ISO 1461:2009 to increase the lifespan of the machine.

YouTube Search *'Cyclone Cotton Stalk Shredder, Mississippi'* to see this machine in action!

Specifications	MJ30-920
Overall width	31'
Cutting width	30'
Transport width	13' 9"
Power (HP)	180 - 250
PTO (rpm)	1,000
Cutting height	1 ½" - 7"
No. of Rotors	10
No. of Blades	40
Weight	6,834 lbs.
Blade speed	13,700 FPM

- ✓ Impressive forward speeds
- ✓ No wind rowing
- ✓ Requires 50% less HP input than a flail mower
- ✓ Even distribution of cut material
- ✓ Multi-purpose; ideal for heavy scrub and stubble management

Features:

Produced from Strenx® 700, a material 2½ times stronger than standard steels used in agricultural machinery production.

Unique heavy duty blade system for maximum mulching and shredding.

Minimum 50% less power and fuel consumption required than a similar sized flail machine.

Low maintenance machine with less wearing parts than a flail mower.

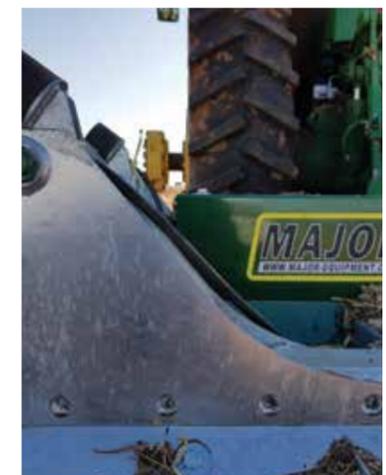

Heavy duty rollers on each deck.

High density rubber inserts on the rollers, delivers efficient vibration reduction.

Hardox® 450 undersole discs.

Heavy duty front castor wheel on each wing.

Scraper bars to keep the rollers debris free.
