Cyclone Shredder

Bridging the gap between batwing and flail mower

The MAJOR Cyclone Shredder has been designed to do the work of a flail mower but requires a fraction of the power and fuel that a similar sized flail mower would consume.

These machines are ideal for every day **grassland management** and the **shredding** of corn, cotton, maize, milo stalks, potato vines, sugar-beet tops and other crops.

The MAJOR Cyclone is also ideal for **orchard maintenance** to enable disease control and maximise yield potential. The unique blade system delivers a fine mulch and even distribution of mulched material. This speeds up the decomposition process and puts **nutrients** and moisture back into the soil.

The MAJOR Cyclone is manufactured using Strenx® 700 MC high-strength steel and hot-dip galvanized to increase the lifespan of the machine.

MJ30-920

Blades

Roller ends

MJ30-920

- ✓ Impressive forward speeds
- ✓ No wind rowing
- ✓ Requires 50% less HP input than a flail mower
- ✓ Even distribution of cut material
- ✓ Multi-purpose; ideal for heavy scrub and stubble management

MJ30-630

Features:

Produced from Strenx® 700, a material 2½ times stronger than standard steels used in agricultural machinery production.

Unique heavy duty blade system for maximum mulching and shredding.

Minimum 50% less power and fuel consumption required than a similar sized flail mower.

Low maintenance machine with less wearing parts than a flail mower.

Heavy duty rollers on each deck.

High density rubber inserts are fitted on the MJ30-920 rollers to deliver efficient vibration reduction.

Hardox® 450 undersole discs.

Heavy duty front castor wheel on each wing of the MJ30-920 model.

Specifications	MJ31-280	MJ30420DW	MJ30-560	MJ30-630	MJ30-920

About Major

Since 1976, Major Equipment continuously innovates and engineers reliable and easy to operate tractor-powered equipment with the strength and stamina for agricultural, grounds maintenance and industrial settings. The designs combine the best features in modern machinery, for efficiency and productivity in every field. Modern manufacturing techniques and best-in-class components are used to maximize product performance, increase machinery lifespan, and reduce the total cost of ownership.

MAJOR. Quality, resilience, and pride.

Every MAJOR product stands for the quality, resilience and pride that reflects its agricultural roots. The family-owned and operated business is based in the West of Ireland, a country renowned for engineering excellence around the world.
